Common Web Hosting Mistakes Beginners Make

Mistake #1: Choosing the Cheapest Host

That $2.99/month host often has slow support, frequent downtime, and hidden renewal fees. You end up paying with lost traffic and sales.

Mistake #2: Not Checking the Renewal Price

Many hosts discount the first term massively, then double or triple the price. Hosting.com offers transparent, competitive renewal rates.

Mistake #3: Ignoring Backups and Security

Assume nothing. Your host should provide automated daily backups and basic WAF. Hosting.com includes both.

Mistake #4: No Launch Checklist

You forget SEO setup, analytics, email deliverability, and SSL verification. Avoid this entirely:
